

MEDICINE CABINET GUN SAFE

A hide-away safe that fits and locks into your standard Medicine Cabinet. Both 10 key or Fingerprint locks.

Description:

Gun Safe – The design allows for mounting the safe either within a standard medicine cabinet (3.4" depth) or on a bookshelf with optional simulated book front or photo frame, all hiding the safe's location from sight. The safe has locking wings that bolt into the medicine cabinet, bookshelf, or can be bolted directly to a wall. The safe is made to hold a full size Glock or other pistol, or any medicines, or property you want protected. The safe can be made with a simple 10 key or a 10 key plus fingerprint. Rechargeable battery operated with USB recharge port. Battery charge will last over 1 year and can be opened 1300 times between charges.

Optional false front covers for shelf: Books, Photo Frame

All gun safety devices come with DOJ and all other required certs.

ODI can provide the standard safe, or customize the safe and features for any application. Please contact us for further information.

FINGERPRINT GUN CABLE LOCKS

NO KEYS NEEDED!

Description:

Cable locks can be used for virtually any gun through the breach, or can be used to lock up bicycles or other valuables without worrying about locating the keys - Especially in an emergency. You can register up to 10 fingers, batteries are rechargeable, and last up to 1300 openings and stay charged for over a year. Opening time is <1 second. Security level: FAR <0.001% and FRR <0.1%.
